❖ Silicone Housing Seals

Don't risk it with flat gaskets – protect your design with superior performance of custom silicone housing seal.

Silicone housing seal custom designed by Puja Fluid Seal Pvt. Ltd. outperform moulded flat gaskets in an extensive variety of housing applications. Featuring a round cross section and designed to your specifications, they ensure a leak proof environment.

The perfect match of Durometer, Shape and Color

Though available in a durometer range of 20-80 Shore A, the silicone housing seal can also be made even softer to match compression set requirements of plastic or metal housing applications. We can produce your seal in the most complex shapes and color-match the silicone material in solid or translucent colors.

Advanced Manufacturing Processed for Cost-effective Solutions

Our molding systems provide consistent, high quality and cost-effective housing seals to utilize the latest vacuum compression and transfer molding technologies to meet your requirements.

Fast Prototypes and Design Engineering Assistance

In-house tooling capabilities and an experienced design engineering team enable to deliver housing seal prototypes fast. Our engineers have the expertise in polymer technology – with a particular emphasis on silicone – as well as other rubbers like NBR, EPDM, NEOPRENE, FKM, HNBR, AFLAS and metal materials to assist you in creating the right housing seal solution for your needs.

Seal it Right, Right from PUJA SEALS

Our housing seals are made in India. As a leading designer and manufacturer of seal and sealing devices, Puja Seals has the capabilities to meet all your seal requirements. Call or visit our website today for more information.

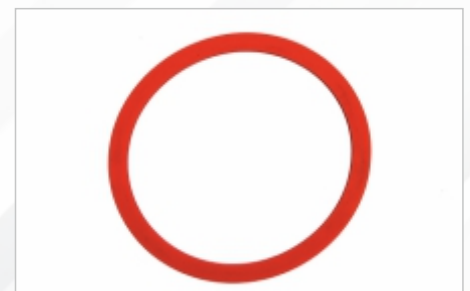

❖ Product Information:

The flat sides on cross section of this automotive seal help with tolerance stack-up on the plastic housing mating parts.

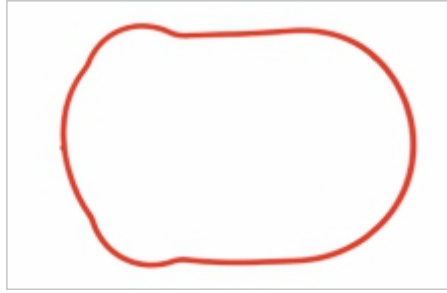

Molded silicone rubber enables exacting tolerances on the complex shape of this housing seal for pneumatic tool.

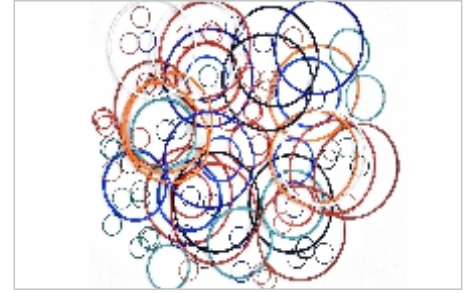

A large size housing seal for storage containers keeps food fresher.

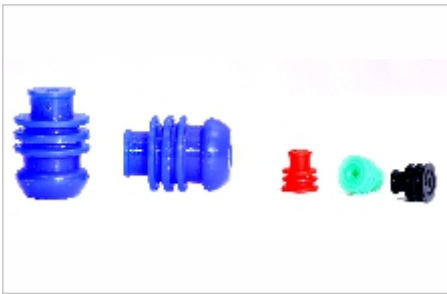

Complex shape of custom housing seal creates one piece serving two functions to protect electronics components.

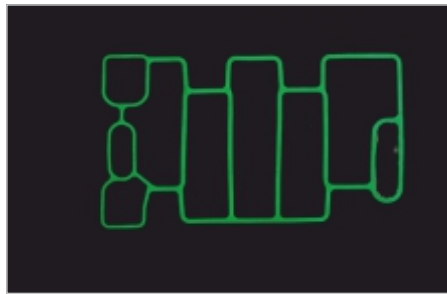

Weather seal for digital readout offers low compression force, yet the best compression set resistance.

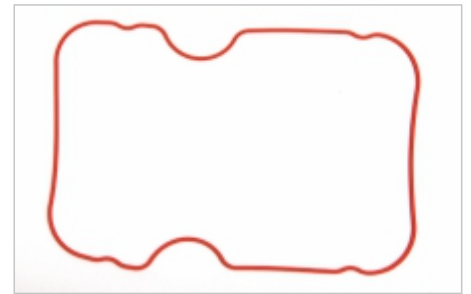

O-rings are an essential component in machinery across all kinds of industries, Extreme temperature range and low temperature flexibility are characteristics of silicone rubber.

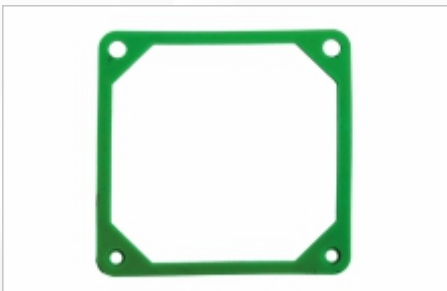

Wiring harness grommets used in auto electric and electronic components—oil extended grade (self-lubricant).

This Housing seal is designed with splines for support in air flow regulator.

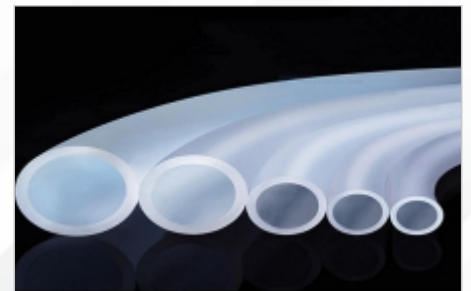

Weather seal used in a home lighting application offers excellent ozone and weather resistance.

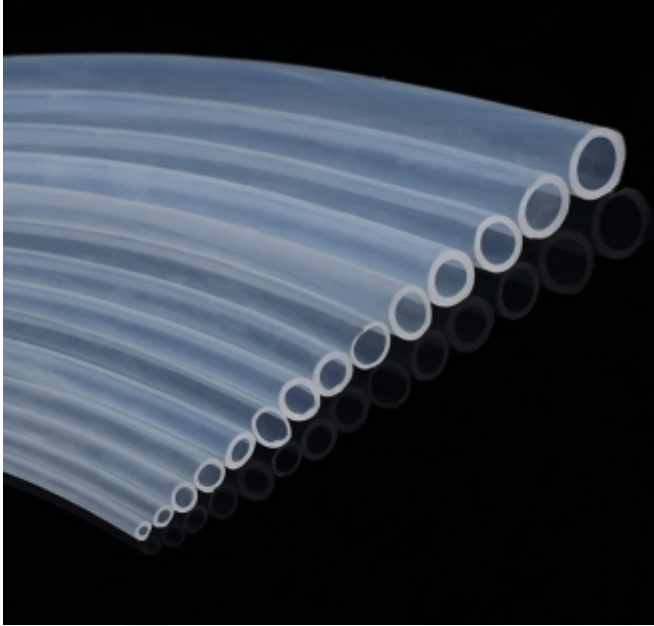

Square shape Flat gaskets used for sealing engine units.

We produce wide range of Silicone extruded rubber profiles like T-shape, E-Shape, L-shape, U-shape, Round shape, etc...

Silicone rubber tubing is used extensively in the aerospace and medical industry.

*A leading designer and manufacturer of seals and sealing devices,
we have the capabilities to meet all your seal requirements.
